Paper Cranes
For this activity you will require extra paper and a range of pencils (HB – 6B pencil).

Procedure
1. Take a sheet of A4 paper and cut it into a perfect square.
2. Use the instructions provided to create a paper crane.
3. Arrange your paper crane on an empty table, deliberately making decisions about the way light falls across your crane and the shadows that are created.
4. Using a HB pencil, sketch your crane from different angles.
5. Select your favourite sketch and redraw for a final presentation. Using a darker grade of pencil, add tone to your crane to emphasise the form and shadows that may fall onto your table from the crane.
